

# FOCUS

# Tree Planting

## Schools and Parents

Tree planting is good for the environment. It brings communities of people together and it even strengthens people's connections with each other—families and friends united by a goal of giving back to the environment and getting a bit dirty along the way.

## What we would like to do

Lions international and Tickhill and District Lions made a pledge to plant trees not only because its good for the environment. It's also a great way to bring other interested groups together and enhance the way our local area looks.

We would like to work with and encourage other groups, individuals or schools to plant trees or maybe even a new hedgerow. We could help to provide trees, tree guards and stakes if required as well as a bit of manpower.

Perhaps a Family Tree Sponsorship Scheme in your area, where you and your family could nurture and watch your tree grow over the years. So please get in touch and let's see what we can do to help.

## You can help us

Do you know any land owner, farmer or individual who would like trees planting on their land. Please call our Secretary on 0844 963 2462.
